COMPREHENSIVE ABILITY:

Direction (Q. No. 101-105): Read the following passage and answer the question given below:

I must say that, beyond occasionally exposing me to laughter, my constitutional shyness has been no disadvantage whatsoever. In fact, I can see that, on the contrary, it has been all to my advantage. My hesitancy in speech, which was once an annoyance, is now a pleasure. Its greatest benefit has been that it has taught me the economy of words. I have naturally formed the habit of restraining my thoughts. And I can now give myself the certificate that a thoughtless word hardly ever escapes my tongue or pen. I do not recollect ever having had to regret anything in my speech or writing. I have thus been spared many a mishap and waste of time. Experience has taught me that silence is part of the spiritual discipline of a votary of truth. Proneness to exaggerate, to suppress or modify the truth, wittingly or unwittingly, is a natural weakness of man, and silence is necessary in order to surmount it. A man of few words will rarely be thoughtless in his speech; he will measure every word. We find so many people impatient to talk. There is no chairman of a meeting who is not pestered with notes for permission to speak. And whenever the permission is given the speaker generally exceeds the time limit, asks for more time, and keeps on talking without permission. All this talking can hardly be said to be of any benefit to the world, but is so much waste of time. My shyness has been in reality my shield and buckler. It has allowed me to grow. It has helped me in my discernment of truth.

101. The title that best expresses the ideas of the passage is,

- (A) The value of silence
- (B) The importance of shyness
- (C) The discernment of truth
- (D) Silence and truth

102. In the beginning, the author felt his hesitancy in speech as,

- (A) A shield

- (B) A pleasant experience

- (A) The habit of speaking too much
- (B) The habit of speaking aloud
- (C) The habit of restraining his thoughts
- (D) The habit of using choice words

104. What is the value of silence for a votary of truth?

- (A) It is a part of devotion
- (B) It is a part of philosophical truth
- (C) It is a mental discipline
- (D) It is a part of spiritual discipline

105. Who will be rarely thoughtless in a speech?

- (A) A man of few words
- (B) A man of no words
- (C) A man of high thoughts
- (D) An extempore debater

Direction: Read the following passage and answer the question given below:

The possibility of this invention is due to three men—Faraday, Maxwell, and Hertz. In alternating layers of experiment and theory these three men built up the modern theory of electromagnetism and demonstrated the identity of light with electromagnetic waves. The system which they discovered is one of profound intellectual interest, bringing together and unifying an endless variety of apparently detached phenomena, and displaying a cumulative mental power which cannot but afford delight to every generous spirit. The mechanical details which remained to be adjusted in order to utilize their discoveries for a practical system of telegraphy demanded, no doubt, very considerable ingenuity, but had not that broad sweep and that universality which could give them intrinsic interest as an object of disinterested contemplation.

From the point of view of training the mind, of giving that well informed, impersonal outlook which constitutes culture in the good sense of this much-misused word, it seems to be generally held indisputable that a literary education is superior to one based on science. Even the warmest advocates of science are apt to rest their claims on the contention that culture ought to be sacrificed to utility. Those men of science who respect culture, when they associate with men learned in the classics, are apt to admit, not merely politely, but sincerely, a certain inferiority on their side, compensated doubtless by the services which science renders to humanity, but nonetheless real. And so long as this attitude exists among men of science, it tends to verify itself; the intrinsically valuable aspect of science tend to be sacrificed to the merely useful, and little attempt is made to preserve that leisurely, systematic survey by which the finer quality of mind is formed and nourished

106. What did the three men do?

- (A) They found a phenomena
 - (B) They built-up the modern theory of electromagnetism
 - (C) They invented telephone
 - (D) They made radio

 - (B) The men of technology
 - (C) The men of science
 - (D) Literary men
110. What do the scientists feel in the company of learned men of classics?
- (A) Free and fine
 - (B) Out of place
 - (C) A certain sense of superiority
 - (D) A certain sense of inferiority

Direction : Read the following passage and answer the question given below

The e-waste (Management and Handling) Rules, 2011, notified by the Ministry of Environment and Forests, have the potential to turn a growing problem into a development opportunity. With almost half-a-year to go before the rules take effect, there is enough time to create the necessary infrastructure for collection, dismantling and recycling of electronic waste. The focus must be on sincere and efficient implementation. Only decisive action can reduce the pollution and health costs associated with India's hazardous waste recycling industry. If India can achieve a transformation, it will be creating a whole new employment sector that provides good wages and working conditions for tens of thousands. The legacy response of the States to even the basic law on urban waste, the Municipal Solid Wastes (Management and Handling) Rules, has been one of indifference; many cities continue to simply burn the garbage or dump it in lakes. With the emphasis now on segregation of waste at source and recovery of materials, it should be feasible to implement both sets of rules efficiently. A welcome feature of the new e-waste rules is the emphasis on extended producer responsibility. In other words, producers must take responsibility for the disposal of end-of-life products. For this provision to work, they must ensure that consumers who sell scrap get some form of financial incentive.

The e-waste rules, which derive from those pertaining to hazardous waste, are scheduled to come into force on May 1, 2012. Sound as they are, the task of scientifically disposing a few hundred thousand tonnes of trash electronics annually depends heavily on a system of oversight by State Pollution Control Boards (PCBs). Unfortunately, most PCBs remain unaccountable and often lack the resources for active enforcement. It must be pointed out that, although agencies handling e-waste must obtain environmental clearances and be authorized and registered by the PCBs even under the Hazardous Wastes (Management, Handling and Transboundary Movement) Rules, 2008, there has been little practical impact. Over 95 percent of electronic waste is collected and recycled by the informal sector. The way forward is for the PCBs to be made accountable for enforcement of the e-waste rules, and the levy of penalties under environmental laws. Clearly, the first order priority is to create a system that will absorb the 80,000 strong workforce in the informal sector into the proposed scheme for scientific recycling. Facilities must be created to upgrade the skills of these workers through training and their occupational health must be ensured.

Recycling of e-waste is one of the biggest challenges today. In such a time, when globalization and information technology are growing at a pace which could only be imagined few years back, e-waste and its hazards have become more prominent over a period of time and should be given immediate attention.

111. What according to the passage is important now for e-waste management?
- (A) Making rules
 - (B) Reviewing rules
 - (C) Implementing rules
 - (D) Notifying rules
112. Which of the following can be one of the by-products of effective e-waste management?
- (A) India can guide other countries in doing so
 - (B) It will promote international understanding
 - (C) It will promote national integration
 - (D) It will create a new employment sector
113. Which of the following rules has not been indicated in the passage?
- (A) e-waste rules 2011
 - (B) Pollution check rules
 - (C) Hazardous wastes Rules, 2008
 - (D) All these have been indicated
114. 'Both sets of rules' are being referred to which of the following?
- (A) Solid wastes and Hazardous wastes
 - (B) E-wastes and Hazardous waste
 - (C) Solid waste and e-waste
 - (D) E-waste and e-production
115. E-waste rules have been derived from those pertaining to?
- (A) Hazardous waste
 - (B) PC waste
 - (C) Computer-waste
 - (D) Municipal solid waste

116. Which of the following will help implement 'both sets of rules'?
- (A) Employment opportunities
 - (B) International collaborations
 - (C) Financial incentive
 - (D) Segregation of waste at source
117. E-waste rules came/come into force from?
- (A) 2008
 - (B) 2009
 - (C) 2010
 - (D) 2012
118. Which of the following best explains the meaning of the phrase- "Which could only be imagined few years back", as used in the passage?
- (A) It was doomed
 - (B) It took us few years
 - (C) Not a reality few years back
 - (D) Imagination is better than IT
119. Which of the following is true in the context of the passage?
- (A) No city dumps its waste in lakes
 - (B) Some cities burn garbage
 - (C) PCBs have adequate resources to active enforcement
 - (D) E-waste was a much bigger challenge in the past
120. Which of the following is not true in the context of the passage?
- (A) Some form of financial incentive is recommended for the producers
 - (B) Some financial incentive is recommended for the consumers
 - (C) E-waste will be a few hundred thousand tonnes
 - (D) The agencies handling e-waste have to obtain environmental changes

DIRECTIONS (Q. Nos. 121 to 125): Read the passage carefully and choose the best answer to each question out of the four alternatives

Ever since independence, land reforms have been a major instrument of state policy to promote both equity and agricultural investment. Unfortunately, progress on land reforms has been slow, reflecting the resilience of structures of power that gave rise to the problem in the first place.

The main instrument for realising more equitable distribution of land is the land ceiling laws. These laws were enacted by several states during the late 1950s and 1960s, and the early 1970s saw more stringent amendments in the laws to plug loopholes in the earlier laws. But the record of implementation has not been satisfactory. Around 3 million hectares of land has been declared surplus so far, which is hardly 2 percent of net sown area in India. About 30 percent of this land has not yet been distributed as it is caught up in the litigations. Besides, a number of Benami and clandestine transactions have resulted in illegal possession

of significant amounts of land above ceiling limits. There are widespread reports of allotment of inferior, unproductive, barren and wasteland to landless household, many of whom have been forced to sell it off, in the absence of resources to make it productive. In many instances, lands allotted to the rural poor under the ceiling laws are not in their possession. In some cases, Pattas were issued to the beneficiaries, but possession of land shown in the Pattas was not given, or corresponding changes were not made in the records of right.

The balance of power in rural India is so heavily weighed against the landless and the poor that implementing land ceiling laws is difficult. It is clear that without massive mobilisation of the rural poor and depending on democratic governance in rural India very little can be achieved in this direction. Although half of India's population continues to depend on agriculture as its primary source of livelihood, 83 percent of farmers operate holdings of less than 2 hectares in size and the average holding size is only 1.23 hectares. This is often in fragments and unirrigated. There are also those who are entirely landless, although agriculture is their main source of livelihood. They have inadequate financial resources to purchase and often depend on leasing in small plots, on insecure terms, for short periods, sometimes only for one season. Hence, many face insecurity of tenure and the growing threat of land alienation and pressure from urbanisation, industrialisation and powerful interest.

121. Why does the land reform prove to be slow?

- (A) Because of the disparity in power structure
- (B) Because of the power of the government
- (C) Because states have different laws
- (D) Because of the scarcity of land in the country

122. Which of the following statements is/are correct?

- (1) Land ceiling laws have proved to be unsatisfactory
- (2) The democratic structure of government cannot preside to the problem solution reforms
- (3) The owners of land have abundant natural resources
- (4) Identified land for distribution has not been distributed due to court cases against it

Select the CORRECT answer using the codes given below:

- (A) 1 and 4
- (B) Only 1
- (C) 3 and 4
- (D) 2 and 4

123. One of the reasons of selling off the lands by the allottees is that the lands were

- (A) unproductive and barren
 - (B) salty, not getting water
 - (C) fertile but uncultivable
 - (D) with the powerful people
124. Which word/group of words in the passage means "lawsuit"?
- (A) Amendments
 - (B) Litigations
 - (C) Illegal possession
 - (D) Fragments
125. According to the author, what is the primary source of livelihood of majority of India's population?
- (A) Industry
 - (B) Forest
 - (C) Agriculture
 - (D) None of the above
126. What is the 'White revolution' referring to in the Indian Economy?
- (A) Rice
 - (B) Milk
 - (C) Egg
 - (D) Fish
